## FACT SHEET: CTAA's Capital Solutions for Taxicab Companies

If you're in the taxi business and want to improve your edge and bottom line in these challenging times we can help. The Community Transportation Association of America's (CTAA) Capital Solutions program is a leader in providing the resources you need for success. Whether you have a hundred vehicles or just one, we have a place for you.

### CTAA's Capital Solutions provides members:

- Participation in the best vehicle fleet program of its kind linked to high-performance Toyota products like the Prius and Sienna, as well as access to a family of accessible vehicles for passengers with special needs ranging from wheelchairs to stretcher carrier vehicles. Our fleet program includes ToyotaCare to help lower your operating costs for all of our vehicles.
- Access to short- and long-term vehicle financing that rewards those with good credit history, as well as helping those who are just starting out or need a second chance.
- A full range support services, like our national insurance exchange and our fleet fueling programs.
- The ability to obtain a full range of discounted accredited training and educational programs that help you achieve the highest standards of quality services and provide ways to make your service the safest.

Our team of transportation business advisors are available to members to help design a better approach to your business, big or small. This includes ways to improve your standing with intermediaries, transportation brokers, insurance companies, regulators and, especially, your passengers. Member discounts for these activities are also part of our services to those who own or operate taxis.

Joining with us you'll also be part of a network of thousands of providers who share valuable insights and experiences both at our annual conference and other network opportunities.
