The Rapidly Approaching Future of High-Speed Rail

Recent events have produced unprecedented momentum and tangible action to develop high-speed rail operations and significant improvements to the nation's passenger rail network. RAIL will take all the initiatives, legislation and proposals and place them in a national context, while also using them to formulate our first-ever Passenger Rail Symposium in May 2010 in Long Beach, Calif.

RAIL's Best and Brightest

The success of all forms of passenger rail is predicated upon the involvement of dedicated and dynamic leaders who shepherd projects from vision to reality. We'll spend some time with a number of these key officials and personalities, and profile how they make decisions and their perspective on building successful rail services, including:

Federal Leaders

State and Local Decision-Makers

Regional Officials

Transit Professionals

Industry Executives
