This list was compiled from information gathered from the Association for Commuter Transportation (ACT), the National Center for Transportation Research 2003 Transportation Association Survey, the Center for Urban Transportation Research, University of South Florida and research conducted by the Community Transportation Association of America Joblinks Employment Transportation Initiative.

The Joblinks “Transportation Toolkit for the Business Community” was created with funding from the Office of Disability Employment Policy, U.S. Department of Labor, through a cooperative agreement between the Community Transportation Association of America and the Federal Transit Administration. The opinions and conclusions expressed herein are solely those of the authors and should not be construed as representing the opinions or policy of any agency of the federal government. January 2012.

The “Transportation Toolkit for the Business Community” gives businesses the information they need now to assist their employees in achieving a timely, cost-efficient commute that promotes their productivity and job satisfaction. View other fact sheets and resources at [www.ctaa.org/transportation\\_to\\_work](http://www.ctaa.org/transportation_to_work) for information on how to access transportation-related tax benefits, partner with local providers to find answers to employees’ and customers’ transportation needs, become part of a transportation management association, and more.

This toolkit was created by the Community Transportation Association of America’s Joblinks Employment Transportation Initiative—serving communities since 1993 in solving employment transportation issues.
